

Overview

The traditional hydrocarbon energy sources are running out. At the same time, the Government and regulators require energy security, stability price, and also cleaner energy supplies. These are some of the factors that make the energy sector complex. In a fast-changing market with pressure from many directions, business people in the energy sector need a firm that not only understands the market but is also immersed in the market to help you achieve your business goals.

Energy has been a key practice for Dentons HPRP over many years. We advise major investors and corporations in relation to the establishment and operation of energy sector businesses and associated activities across Indonesia. Such activities include providing strategic assistance and effective solutions both in transactions and dispute resolution in:

- Upstream and Downstream Oil and Gas
- Renewables Energy
- Conventional generation
- Transmission and distribution
- Retail electricity and natural gas supply
- Pipeline and Maritime Transportation
- LNG, Oil and Gas Trading
- Energy market reform
- Privatization of Energy Enterprises

Our longstanding reputation with regulators and leading corporations provides us with important insights into the latest policies and industrial updates. Familiar with the operations of Indonesia's contract of work system and related issues, our lawyers are able to assist you to respond to any complex challenges arising from oil & gas activities and energy related issues due to prevailing laws and regulations. Upstream or downstream, from exploration to marketing, and from generation to retail, Dentons HPRP can provide you with the innovative advice and insights that you need.
